6	P9	KarUK	Zariya Aitova	Administrative

## Overview of the current status of the project

The project "Development of innovative curricula and modules in Circular Economy and Sustainable Development" continues to move according to plan. At present, the first versions of training modules have been developed, and work is actively underway to adapt them and implement them into training courses.

## Discussion of publishing an article in a local newspaper

During the meeting, the content of the article about the project and publishing details in a local newspaper were discussed. The article should be an important step in raising public awareness of the project and its goals, as well as disseminating information about achievements in the field of circular economy and sustainable development.

### Key points of discussion:

#### Purpose of the article:

The article will focus on highlighting the goals and objectives of the project, as well as describing key achievements, such as the development of innovative training modules, conducting training webinars for teachers, and successful cooperation between universities and educational institutions in different countries.

#### Content:

The article is planned to include:

- An overview of the concept of circular economy and sustainable development.
- Description of the stages of development of educational materials and their practical application.
- Information on the contribution of the project to the development of local educational programs and the promotion of sustainable development.

#### Technical details:

The article will be written in an accessible and informative form to interest both education professionals and a wide audience. It is important that the text is not only informative, but also inspiring for other educational institutions and organizations to participate in similar projects.

#### Distribution:

The publication will be published in a local newspaper to attract the attention of the audience and create a positive image of the project.

### **Conclusion:**

The project continues to progress according to schedule, and the publication of an article in a local newspaper will be an important step in popularizing the project's results among a wider audience. All the goals set for the current month have been successfully achieved, and work on creating educational materials continues.
