

Dear colleague!

The Turkmen Agricultural Institute invites you to take part in the the international competition of scientific project works “*Agroinnovations: the way for sustainable development*”, which is being held on November 12-13, 2025.

Official languages of the competition: Turkmen, English and Russian.

The aim of the competition is to develop scientific thinking, research skills and creativity in students by encouraging them to independently solve important agricultural problems arising from the UN Sustainable Development Goals, promoting sustainable agricultural development and rational use of water resources.

The main objectives of the competition: to promote sustainable development of agriculture and expand students’ knowledge of rational use of water resources; to deepen students’ understanding of scientific approaches and to ensure their use in solving agricultural problems; to introduce students to the role of agriculture in achieving sustainable development goals; developing students’ ability to think and quickly solve emerging problems by identifying and analyzing agricultural problems; to develop in students a sense of responsibility for sustainable development; development of innovative and practical solutions for the agricultural sector; to increase students’ interest in science, technology, engineering and mathematics (STEM).

Competition areas:

1. Agricultural projects
2. IT projects
3. Business projects

Requirements for the design of scientific project works and for the presentation and the criteria for evaluating scientific project works can be found in detail in the competition regulations.

I, II and III places in each direction are determined based on the sum of points scored for all indicators. The winners of the competition will be awarded diplomas of the I, II and III degrees on behalf of the rector of the institute.
